

INSTRUCTION

Homework

Teachers may give homework to students to aid in students' educational development. The type, frequency and quantity of homework should be determined by the teacher(s). Such homework should take into consideration the educational needs of students, their age and stage of development. Homework should be an application or adaptation of a classroom experience and should not be assigned for disciplinary purposes. Parent(s)/guardian(s) may wish to act as resources for their children, but should recognize that such assignments are the students' responsibility.
